DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over each of Kikuchi (5,176,976) and Azuma (6,573,017) in view of Kashizaki (6,228,546). Kikuchi (claims) and Azuma (pages 7-8) each teach stilbenquinone compounds used as a charge transport material for an electrophotographic photoconductor and related production methods and apparatus. Kikuchi and Azuma do not teach the stilbenquinone compounds as a polymer. Kashizaki (claims) teaches a similar charge transport material for an electrophotographic photoconductor that is effective as a polymer. It would have been obvious to one of ordinary skill in the art to use the stilbenquinone compounds of Kikuchi and Azuma in a polymeric form as directly suggested by Kashizaki with the expectation of similar beneficial results as directed to charge transport materials used in the same applications.
